Gordius stainless steel cable mesh is a kind of stainless steel woven mesh combines the tensile strength of stainless steel and beautiful diamond opening, elegant and beautiful. Stainless steel cable mesh is generally divided into 2 types. One is knotted stainless steel cable mesh produced by using a special tool to punch holes and then interweaves with each other, featuring high tensile strength, soft net surface and high impact resistance; the other one is stainless steel cable ferrule mesh, unlike knotted stainless steel cable mesh, it is composed of stainless steel ferrules and stainless steel cables, featuring rigid structure, good visibility and excellent corrosion resistance. Stainless steel cable mesh is widely used in zoos, gardens, balconies, shopping malls, building reinforcement, building decoration, mine support and other places.

Elastic, soft stainless steel cable mesh meets all your project demands.
